Executive summary

4C Surveillance Systems Pty Ltd is a family, locally owned and operated SME based in Devonport. All our employees reside in Tasmania. Currently we employ six people and provide apprenticeships and other training. Specialising in CCTV, our engineers have over 30years experience. Success of this panel contract is likely to result in the recruitment of a further technician or apprentice.

Our aim is to provide exceptional service, high quality products and value for money to all areas of Tasmania, whether they be with metropolitan areas or remote communities.

4C Surveillance Systems Pty Ltd operates wholly from within Tasmania. As a result, expenditure on wages, facility maintenance, motor vehicles, rent, electricity, travel costs and most other major costs remain within Tasmania. 4C Surveillance Systems Pty Ltd is committed to supporting local businesses and the community and wherever possible, we will also source materials and services from within the local area.

Although 4C Surveillance Systems Pty Ltd would be engaging with existing supply chains, we are always seeking other local suppliers of equipment, materials and services.
