Executive summary

Mekina Technologies Pty Ltd. (established 20 years ago) a Tasmanian Owned and Operated Company dedicated to achieving excellence in the specialised areas of Security Alarm, Fire Alarm, Access Control Closed Circuit Television Installations, Voice, Data, Communications and Alarm Monitoring & After-hours Emergency Call Centre.

Mekina Technologies Pty Ltd. is a **Corporate Member of the Australian Security Industry Association Ltd (ASIAL)** and following a recent compliance inspection, by industry representatives was awarded a 'Certificate Of Compliance' and **GRADE A1** by ASIAL in recognition of compliance to all relevant industries standards. Mekina Technologies Pty Ltd is also a Member of the **National Electrical Communications Association (NECA)**.

Approximately 14-years ago Mekina Technologies Pty Ltd invested in excess of \$1.5 Million into the construction of a dedicated Security Monitoring Facility and After-hours Emergency Call Centre, **designed and built to Australian Standards, for Central Stations AS2201.2, and complies with all Statutory and Industry requirements for which it was built.** The Monitoring Centre uses the latest technology and software currently available in Australia and is fully capable of monitoring **Global System for Mobile communication (GSM)** and **General Packet Radio Services (GPRS)** systems.

Our **24-hr Monitoring & After-hours Emergency Call Centre Operators** also handle client specific medical emergency and personnel work safety related issues, and implement predetermined action plans/instructions for each individual situation. Employing local

people gives our Company the edge as we know the environment and exactly what the day to day conditions are, in and around Tasmania.

Our Operators have an established rapport with all Emergency Services, which significantly enhances two way communications, thus providing our Clients and their personnel with quality service, support and immediate implementation of the Client's action plans/instructions for any given situation. Company Director and Electronics Engineer Jacek Mekina leads the Team of dedicated and skilled personnel, who hold various qualifications, accreditations and are licensed according to Government and industry requirements.

Our goal is to always work closely with our customers to improve efficiency, productivity, service performance, and achieve customer satisfaction with the security package delivery process.

Mekina Technologies Pty Ltd is in the business of building relationships with our Clients by being the best provider of security services in Hobart, and Tasmania as a whole. Our very experienced and dedicated team at Mekina Technologies Pty Ltd has many years of practical experience and can design, supply, install, service and maintain most Security, Fire, Access Control (including integrated system) and Closed Circuit Television Systems.

All Technical personnel employed by Mekina Technologies Pty Ltd engage in a diverse range of installations and as a consequence they hold a number of licences and accreditations specific to job requirements that are within the parameters of the work undertaken by Mekina Technologies Pty Ltd. This extends to mandatory requirements by most Companies, including Government Business Enterprises, for all tradespersons to receive Client specific induction training/programs, and be accredited, prior to performing any agreed tasks at the Clients property/premises; this includes being compliant with Occupational Health and Safety requirements for those organisations.

Mekina Technologies Pty Ltd (Mekina) is a 100% Tasmanian Owned and Operated Company and any revenue generated by the company remains in Tasmania. Mekina has a workforce of 23 full time employees, comprising of a comprehensive range of skilled management, professional, technical, administrative and operational trades personnel, all with required qualifications, licences and accreditations operating state wide.
