Executive summary

The goods supplied under this Contract are key components for the Pelton Hydro Power Stations Poatina and Fisher. The equipment is specifically engineered and manufactured in Europe as per the latest technology available. The goods provided are improving the annual energy production of the Hydro Power Stations and ensuring the future operation for the next decades. There are no local suppliers available in Tasmania providing the technology supplied.

The Contract agreement is made for supplies only. The installation is done by Hydro Tasmania with own local staff.

The goods supplied are definitely having broader economic and social effects such as:

- In future the hydro power stations will utilize the available hydro energy more efficiently
- With the supplied goods the hydro power stations are upgraded to operate sustainably over the next decades. The position of Hydro Tasmania as most important provider of green energy is secured.
- Local employment for installation, operation and maintenance of the power plants is protected.
