Tasmanian Industry Participation Plan Executive Summary

Procurement details

Procurement ID	3012003218
Procurement title	SAP Implementation Partner
Name of Responsible Agency/Entity	Hydro Tasmania

Supplier details

Name of supplier	Platinum DB Consulting, Inc.

Executive summary

Platinum DB Consulting Inc. in association with Fawmore Pty Ltd is fortunate to have the opportunity to assist Hydro Tasmania with the strategic implementation of SAP Capital Portfolio and Project Planning (EPPM). Implementing the SAP Capital Portfolio and Project Planning solution will offer significant benefits to the Australian and Tasmanian economy.

Below we outline how EPPM can benefit the Tasmanian economy:

EPPM can enable Improved Infrastructure Planning and Delivery. Tasmania, like many regions, faces challenges in managing large-scale infrastructure projects. SAP Enterprise Project and Portfolio Management (EPPM) enables Integrated long-term, mid-term, and short-term planning for capital projects. This enables better coordination across departments (e.g., transport, energy, water) for complex projects like new substations or road networks. It also supports real-time tracking of budgets, timelines, and resources, reducing delays and cost overruns.

EPPM can enable Enhanced Public Sector Efficiency. Government agencies can use SAP EPPM to prioritize projects based on strategic value and resource constraints, ensuring taxpayer money is spent effectively. EPPM can streamline approvals and compliance through automated workflows and audit trails. EPPM can improve transparency and accountability, which can boost public trust and attract federal funding.

EPPM can provide support for Economic Development Initiatives. Tasmania's economy relies on sectors like renewable energy, tourism, and agriculture. SAP EPPM can facilitate investment planning for renewable energy projects, such as wind farms or hydroelectric upgrades. EPPM can enable better grant and funding management for regional development programs. In addition, EPPM can support public-private partnerships by providing a shared platform for project tracking and performance measurement.

EPPM supports Data-Driven Decision-Making utilizing SAP's analytics capabilities. Decision-makers can evaluate project ROI, risk, and alignment with economic goals. EPPM scenario modeling helps simulate the impact of different investment strategies on employment and sustainability.

EPPM supports job creation and skills development. Implementing and maintaining SAP EPPM SAC Analytics, SAC Planning, and BTP development, will create high-skilled IT and project management jobs in Tasmania. In addition, encourage local upskilling and training programs, especially in digital transformation and enterprise software.

Thank you again Hydro Tasmania for selecting Platinum DB Consulting and Fawmore for this important initiative.

We look forward to a great Partnership with Hydro Tasmania and the Tasmanian Community.

Best Regards,

Guidance note (can be deleted): The executive summary should be a brief overview of the information contained in the Tasmanian Industry Participation Plan, highlighting how the business will positively impact on the Tasmanian community.

Information provided in the Economic and Social Benefits Statement may be used as a guide.

The summary can be in point form, addressing aspects such as:

- *the impact of the business;*
- *the goods and services to be utilised in the contract; and*
- *any broader economic and social benefits.*
