------------------	------------------

Executive summary

C5 Pro-Solutions is a proud Tasmanian owned power engineering SME with our head office in Hobart and second office in Launceston. C5 employees 26 Tasmanians and 1 employee in NSW.

This engagement for the design, estimation and engineering services will actively employ 14 Tasmanian C5 employees with the prospective of an additional 3-4 local employees depending on the volume of work that is required.

The allocation of project will be 100% based within Tasmania and task specific can be allocated through our pool of external service providers which are based both locally within Tasmania and interstate.

The number of available hours is dependent on the type of project complexity to allocate the corresponding resource to deliver the works. As such, a range of 1500 to 2500 hours per month could be used for comparative purposes.

Guidance note: The executive summary should be a brief overview of the information contained in the Tasmanian Industry Participation Plan, highlighting how the business will positively impact on the Tasmanian community.

Information provided in the Economic and Social Benefits Statement may be used as a guide.

The summary can be in point form, addressing aspects such as:

- the impact of the business;*
- the goods and services to be utilised in the contract; and*
- any broader economic and social benefits.*
